Dear Alex and the team at 'Stant'

I am writing to express our heartfelt gratitude after you intervened and saved what had turned into a disastrous experience with our previous "builders" (in inverted commas).

The previous people we had been left with no choice but to sack after they had done some of the building in a very botched and unprofessional way, with door openings varying in shape and size, walls being wonky, and many other problems presenting along the way.

Alex and the team did a fantastic job, came in and assessed what had been done (much shaking of the heads and sighing) then got to work on doing remedial work and repairing to complete the job to a standard we never could have expected from where we were 3 weeks ago. The finish is fantastic, despite the botched beginning by the others, and the lads from Stant were great. They were polite and respectful of us, and of the building being a working building, they kept the work mess to a minimum, and cleared up completely each evening.

Also we are grateful that you were able to respond quickly to our plea for help, started work almost immediately, and came each day as you had said you would, and worked steadily to complete the job.

We cannot thank you enough, and also would recommend you with full confidence to anyone looking for a reliable and honest building firm, who will get a good job done with no dramas. If we need any further work at any time in the future, we know where to come.

Thank you to everyone at Stant
On behalf of everyone at RASASC NW
